**Past, present, and future of aquatic ecosystems
— when environmental technology meets and needs ecological research**

特邀专家

Prof. Martin J. Kainz

WasserCluster Lunz – Inter-university Center for Ecosystems Research

Head of research group LIPTOX

Prof. Kainz has a wide experience in aquatic ecosystems combining basic research with management. In particular, he works on toxic and beneficial effects of aquatic compounds for fishes and humans. He has professional partnerships in Europe, Canada, USA, Australia and New Zealand, Brazil, and China.

In this lecture, he will highlight international best-practice examples on how aquatic ecosystems integrity was reestablished, which parameters to consider to prevent aquatic ecosystems to collapse, and how combine ecological research with environmental technology today.

时间地点

2019年4月3日（周三） 15:30-17:00 同济大学明净楼121报告厅

本期召集人：王锐 副教授
